Huawei ICT Competition: preliminary round briefing, summary

Team: RESQ4ACE (Universiti Teknologi MARA) · **Round:** Preliminary · **Date of briefing:** not stated in the recording **Source:** recording "huawei preliminary brief.aac" (17.6 minutes). Transcript in `transcript/`.

> **Transcript quality:** made with Whisper's `base` model. Some names and terms are wrong (for example "Nazrin", "MMU", "EP" and "Mr. Drew Hong-chwa" are probably mishearings). The format rules below are clear in the audio, but check any name or number against the recording before quoting it to the organizer.

---

1. Format rules (confirmed in the call)

Rule	What was said
One slide or poster only	Organizers repeated this several times. More than one page will lose points. An early remark that several pages were allowed was corrected.
Team presents together	All members must be in the same space and on the same laptop or screen, with one person presenting.
Remote members	A member who cannot attend should contact the organizer. The organizer will decide case by case.
Demo or video	Not required. A demo can raise your chances, since video teams have often scored higher, but the one-page rule means no video in the preliminary round.
Camera and sharing	The organizers discussed whether the camera should focus on the speaker. They said they would not penalise this, and that presentation quality is what counts.

2. How judging works

- **Presentation quality matters most.** The organizers said they are judging the ideas and the presentation, not checking rule compliance.
- **Uniqueness** of the problem and the solution is vital.
- **Feasibility.** The idea should be realistic, with signs that it is already being built or researched. Something impossible would be rejected.
- **Affordability for society** is valued. A low-cost product that helps many people is worth discussing. Having a finished product is not required; a good idea and a good presentation are enough.
- **Format penalties** were described as small compared with presentation quality.

3. Structure advice

- Break the slide into sections: **problem, solution, impact**.
- Keep it clear, entertaining and fast.
- Have a reliable internet connection.

4. Timing

- The presentation is about **five minutes**.
- Results may come quickly, possibly the same day. No firm date was given for the semi-final.

5. Open questions (not answered in the call)

1. Is a **single landscape page** acceptable, and can the poster's footer and small print stay as they are? Get this in writing.
2. Must **all three members** be on screen at once? The organizer's answer was clear on "same laptop, same space", but the speaker said it might be reviewed case by case.
3. **Who is the point of contact** for questions? The call was unclear ("send an email", then "no email yet").
4. Is an **"EP"** required? The transcript says "you do not need an EP", which is probably a mishearing (for example "an MVP" or "a prototype"). Check the recording.

6. Actions

#	Action	Owner	Due
1	Email the organizer: confirm the one-slide rule, the three-person-same-laptop requirement, and the point of contact.	Team lead	Before 14 Oct
2	Update the poster to the one-page rule (done: `poster/FloodWay_Poster_1920x1080.png`).	Team	Done
3	Rehearse the script with three speakers and a timer (`PITCH_SCRIPT.md`, about 4 minutes 30 seconds).	All	Before 14 Oct
4	Re-deploy the live demo so the QR code shows the current build with a working backend (see the note in `PITCH_SCRIPT.md`).	Team lead	Before 14 Oct
5	Check the transcript against the recording, or re-transcribe with the `medium` model (about one hour on this laptop).	Team	Optional

7. Points that affect our submission

- Our phone poster is about 9,100 pixels tall. Under the one-page rule, submit the **landscape poster**. The phone poster is kept as a reference only.
- The pitch script was rewritten for one slide and three speakers, with the opening the team agreed: "Good morning judges, my name is Luqman. My name is Nadi. My name is Tisya, and

we are from RESQ4ACE."

- The poster says what is built and what is planned. The judges said they value honesty about feasibility.
